## OBSERVATION INFORMATION

Species	HABITAT	REGION II AND RESTORATION DIVISION	Observed	Spawning	Rearing	Migration	Anadromous
coho			9/22/98		✓		✓

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: one minnow trap [baited w/ salmon eggs, 24 hr soak] caught 2 coho fry in pool below barrier dam [beaver dam 2-3 ft high] two traps placed above barrier caught one rough-skinned newt, no fish. Stream below barrier is 2-3 ft in width, gravel/sand, approx 20-30 m. length. Pond above dam is large, steady water supply.

Name of Observer (please print) Peter Branson FOW III, Dianne Cassidy, Volunteer  
 Date: 9/23/98 Signature: Peter Branson  
 Address: P.O. Box 2073  
Wrangell, AK 99929

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
